----- Air Quality Department Complaint Form -----

Reference Number: 2015092589000749

Business Name: Hickman's Egg Ranch Arlington Complex

Violation Address: Salome Road and Ward Road

Major East/West: Salome Road

Major North/South: Ward Road

On the: SW Corner

City: ARLINGTON

Violation Description: This violation started yesterday at approximately 6pm. I had just arrived home and smelled the manure stench in my area, so it may have started earlier. It dissipated around 8pm and then returned at 4am this morning and is still currently present, which is 7:47am. As a result I did not have a restful sleep due to my having to wake up and close my windows in the night. I am currently trying to vent the smell from my house by running my fans in reverse to create a negative pressure in my home, but that has limited effect because air cannot flow as easily in this direction. Plus I have no way to filter what air is flowing into my home from the outside. My life in the presence of Hickman's operation is becoming intolerable. I know about the meeting coming up on October 21st for renewing Hickman's air quality permit for the Arlington facility. I will be at that meeting to voice my anger at his operations. I will also be bringing a sample of yellow rain water that was gathered from my roof during the last rain storm to show how polluted Hickman is making the air in this area. This water stinks of acidity and has a sulfur smell. I will be out getting supplies this morning so if you choose to call me by phone it will be best to call after 3pm this afternoon.

Date: 9/24/2015 Time: 6:00
